Zeeshan Ali

Mobile Developer & AI Engineer | Section Leader @ **Stanford PAI** | Intl. Hackathons **Judge & Mentor**

connectzeeshanali@gmail.com • Github • LinkedIn • Medium • Website

Awards & Achievements

- **IELTS** - Overall Band 7.0 (S-6.5, W-7.0, L-7.0, R-7.5) [IELTS TRF].
- Selected as Section Leader for **Stanford Probability for AI** [PAI Profile].
- Participated in **7x International Hackathons**. [Certificates]
- Served as judge in international hackathon TLN Hackathon & mentored in ForgeHacks. [Certificate]
- Alumni of **Harvard-founded Aspire Leaders Program** 2026 - Cohort 3. [Certificate]
- Completed **30+ International projects** with **100%** Job success score as Mobile Apps Developer on **Upwork** [Profile].

Education

University of Sargodha - Website - Transcript — Sargodha, Pakistan
BS Computer Science — Sep 2019 – Jun 2024

Relevant Coursework: Artificial Intelligence, Digital Image Processing, Semantic Web Techniques.

Final Year Project

Classy - Image Generation and Captioning System - GitHub - Hugging Face
Kotlin Multiplatform, Python, PyTorch, Stable Diffusion, DreamBooth, Diffusers

- Developed a cross-platform mobile application for image generation and captioning, focused on Pakistani historical architecture.
- Trained Stable Diffusion/DreamBooth text-to-image and image captioning model on custom dataset, for historical places.
- Built cross-platform mobile app and image generation and captioning workflow.

Experience

Feres - Website — Remote, Ethiopia
Lead KMP Mobile App Developer — Jul 2024 – Jun 2026

- Led a mobile engineering team for a ride-hailing and food delivery platform with 1M+ downloads & 70k+ active users.
- Developed shared Android/iOS business logic and reusable UI flows using Kotlin Multiplatform and Compose.
- Built live trip tracking, food delivery order placement flows, REST/gRPC integrations, and Google Maps workflows.
- Reduced ANRs/crashes by 20% and improved API response performance by 15% through modularization and refactoring.

Upwork - Profile — Remote, International
Freelance Mobile Applications Engineer - Top Rated — Apr 2023 – Jun 2024

- Delivered 10+ production mobile projects for international clients, totaling 600+ logged hours and $20K+ earnings.
- Earned **Top Rated** Freelancer Badge by delivering high quality products and support to international clients.
- Built Android, Flutter, Laravel, Firebase, AI-powered, OCR, payment, admin-dashboard, and real-time tracking solutions.
- Managed requirements, architecture planning, client communication, implementation, deployment, and long-term support.

MHV Media OPC Pvt Ltd - LinkedIn — Remote, India
Full Stack Native Android Developer — Jan 2021 – Mar 2023

- Developed and maintained 4+ full-stack mobile applications using Kotlin/Java Android frontends and PHP/Laravel backends.
- Built APIs, admin dashboards, payment gateways, tracking/security tools, and CRM/ERP modules.
- Migrated legacy Java codebases to Kotlin, improving maintainability and reducing bugs by 25%.

Selected Projects

GenAI_PG - On-device Generative AI Playground - GitHub Open Source
Kotlin Multiplatform, Compose Multiplatform, MediaPipe GenAI, LiteRT-LM, Llamatik, RAG, Android, iOS

- Built a Kotlin and Compose Multiplatform mobile app for Android & iOS.
- Implemented on-device LLM inference, runtime backend comparison, chat workflows, and RAG-style context retrieval.
- Explored local model execution using MediaPipe GenAI/LLM Inference, LiteRT-LM, Llamatik, and Google AI Edge tooling.

CoinPay - Crypto Wallet - Github Upwork
Kotlin Multiplatform, Compose Multiplatform, Web3J, BlockChain

- Developed a full fledged Crypto Wallet like MetaMask for Receiving and sending crypto tokens.
- Added support for creating and importing Crypto wallets.
- Integrated Web3J library for executing transactions on Blockchain via third party API service providers.

VC Panel - Vehicle Tracking System - Playstore MHV Media
Kotlin Multiplatform, Compose Multiplatform, Laravel, PHP

- Developed VC Panel from scratch, a native Android Vehicle Tracking and Anti Theft system built in Kotlin and Jetpack Compose.
- Built backend using PHP and Laravel along with Laravel Websockets for realtime updates.
- Built features including Live vehicle tracking, path tracing with replay, security alerts via push notifications and remote controlling.

International Hackathons

ProofLab - Interactive STEM Reasoning Platform - GitHub - Devpost OpenAI Build Week Hackathon
Next.js, React, FastAPI, SymPy, MathLive, KaTeX, Chart.js

- Built a full-stack STEM learning platform with step-by-step symbolic verification.
- Built support for algebra, inequalities, calculus, and complex numbers, supported by interactive number-line and visualizations.
- Developed a LeetCode-style Math challenges module using React visualizations, FastAPI, and SymPy for mathematical evals.

WhisperLens - Video Captioning Pipeline - GitHub - Certificate AMD Developer Hackathon: ACT II
Python, Whisper.cpp, OpenAI API, VLM, FFmpeg, PySceneDetect, Pillow, Docker

- A containerized video captioning pipeline that produces styled captions from video clips.
- Integrated whisper.cpp for local ASR and OpenAI api with Fireworks AI VLM model for AI assisted image captioning.

Chapter Stage - Multi-Agent Interactive Learning Platform - GitHub - Certificate Band of Agents Hackathon
Kotlin Multiplatform, FastAPI, LangGraph, Band, Featherless LLM API

- Developed a multi-agent AI learning platform that transforms textbook chapters into interactive learning experiences.
- Designed an agent orchestration pipeline and deployment of chapter using LangGraph, Band and LLM-based reasoning.

LinguaLink - Multi-Lingual Real-Time Translation Platform - GitHub - Certificate AMD AI Hackathon
Kotlin Multiplatform, Compose Desktop, Deepgram ASR/TTS, Fireworks AI, Llama 3.1 8B, SQLDelight

- Developed a real-time AI interpreter combining streaming speech recognition, LLM-based translation, and speech synthesis.
- Implemented an ASR-to-LLM-to-TTS pipeline using device audio, Deepgram streaming ASR/TTS, and Fireworks OpenAI API.

Volunteering & Teaching Experience

iCodeGuru - Website
Trainer

- Taught **Deep Learning with PyTorch** course covering theoretical concepts of deep learning and implementation of DL models using Python and PyTorch. Playlist
- Co-instructed a **CUDA/GPU programming** course covering the CUDA programming model, memory hierarchy, and optimization techniques (coalescing, tiled matrix multiplication) along with hands-on labs in C++ and Google Colab. Playlist

- Taught **Fundamentals of Operating Systems** and covered topics ranging from processes, threads, CPU scheduling to memory management including practical labs in Linux and C++ code examples in a 6 week course. Playlist

Open Source & Technical Communication

- **Typist-CMP:** Compose Multiplatform typing animation library for Android, iOS, Web, and Desktop. GitHub
- **Canvas Painter:** Cross-platform custom paint/signature library for Android, iOS, Web, and Desktop. GitHub
- **MetaProbeKMP:** Kotlin Multiplatform URL metadata fetching library for Android, iOS, Desktop, and Web. GitHub
- Created software-development content through technical writing and YouTube tutorials. Medium, Youtube

Technical Skills

AI/ML:	PyTorch, Stable Diffusion, DreamBooth, Diffusers, OpenAI APIs, MediaPipe, RAG, OCR, NumPy, Pandas
Languages:	Kotlin, Python, Java, Dart, PHP, SQL
Mobile/Systems:	Kotlin Multiplatform, Compose Multiplatform, Jetpack Compose, Android SDK, Flutter, Coroutines, gRPC
Architecture:	MVVM, MVI, Clean Architecture, Modularization, Repository Pattern, Dependency Injection, State Management
Backend/Tools:	Laravel, FastAPI, REST APIs, Firebase, MySQL, SQLDelight, Ktor, Git, Gradle, Android Studio, IntelliJ IDEA, VPS/LAMP Deployment

Certifications

Machine Learning Specialization, Coursera / DeepLearning.AI - Certificate 2022
Python for Data Science, AI & Development, Coursera / IBM - Certificate 2025
Develop Generative AI Applications, Coursera / IBM - Certificate 2026
