Awards & Achievements

- **IELTS** - Overall Band 7.0 (S 6.5, W 7.0, L 7.0, R 7.5) [[IELTS TRF](#)]
- Completed **30+ International projects** with 100% Job success score as Mobile Apps Developer on **Upwork** [[Profile](#)]
- **3x** International Hackathons [[Certificates](#)]

Education

University of Sargodha - [Transcript](#)

BS Computer Science

Sargodha, Pakistan

Oct 2019 – Jun 2024

Relevant Coursework: Artificial Intelligence, Digital Image Processing, Semantic Web Techniques, Machine Learning, Data Structures, Algorithms, Databases, Software Engineering.

Final Year Project

Classy - Image Generation and Captioning System - [GitHub](#) - [Hugging Face](#)

Final Year Project

Kotlin Multiplatform, Python, PyTorch, Stable Diffusion, DreamBooth, Diffusers

- Developed a cross-platform AI application for image generation and captioning focused on Pakistani historical architecture.
- Personally trained a Stable Diffusion/DreamBooth text-to-image model for historical-place generation using a Diffusers-compatible workflow.
- Built an application interface and supporting AI workflow combining generative image modeling, captioning, and mobile/cross-platform development.

Experience

Feres - [Website](#)

Lead KMP Mobile App Developer

Remote, Ethiopia

Jul 2024 – Jun 2026

- Lead a 3-person mobile engineering team building a cross-platform ride-hailing and food delivery platform with 1M+ downloads and 70k+ active users.
- Developed shared Android/iOS business logic and reusable UI flows using Kotlin Multiplatform and Compose Multiplatform.
- Built live trip tracking, food delivery order placement flows, REST/gRPC integrations, authentication, caching, and Google Maps workflows.
- Reduced ANRs/crashes by 20% and improved API response performance by 15% through modularization, state management improvements, and architecture refactoring.

Upwork - [Profile](#)

Freelance Mobile Applications Engineer - Top Rated

Remote

Apr 2023 – Jun 2024

- Delivered 10+ production mobile projects for international clients, totaling 600+ logged hours and \$20K+ earnings.
- Earned Top Rated Freelancer Badge by delivering high quality products and support to international clients.
- Built Android, Flutter, Laravel, Firebase, AI-powered, OCR, payment, admin-dashboard, and real-time tracking solutions.
- Managed requirements, architecture planning, client communication, implementation, deployment, and long-term support.

MHV Media OPC Pvt Ltd - [LinkedIn](#)

Full Stack Native Android Developer

Remote, India

Jan 2021 – Mar 2023

- Developed 4+ full-stack mobile applications using Kotlin/Java Android frontends and PHP/Laravel backends.
- Built APIs, admin dashboards, payment gateways, tracking/security tools, CRM/ERP modules, and VPS/LAMP deployments.
- Migrated legacy Java codebases to Kotlin, improving maintainability and reducing bugs by 25%.

Projects

GenAI_PG - On-device Generative AI Playground - [GitHub](#)

Open Source

Kotlin Multiplatform, Compose Multiplatform, MediaPipe GenAI, LiteRT-LM, Llamatik, RAG, Android, iOS

- Built an experimental KMP/CMP app for on-device LLM inference, runtime backend comparison, chat workflows, document attachments, and RAG-style context retrieval.
- Explored local model execution using MediaPipe GenAI/LLM Inference, LiteRT-LM, Llamatik, and Google AI Edge tooling.

TypeWell - AI Writing and OCR Assistant

Freelance Project

OpenAI APIs, OCR, Flutter, Dart, Android, iOS

- Developed an AI writing assistant using GPT APIs for text generation, rewriting, tone adaptation, and productivity workflows.
- Integrated OCR-based image-to-text extraction to support writing enhancement from scanned or photographed content.

CoinPay - Crypto Wallet - [Github](#)

Freelance Project

Kotlin Multiplatform, Compose Multiplatform, Web3J, Blockchain

- Developed a full fledged Crypto Wallet like MetaMask for Receiving and sending crypto tokens. It supports creating and importing crypto wallets.

International Hackathons

LinguaLink - Multi-Lingual Real-Time Translation Platform - [GitHub](#) - [Certificate](#)

AMD AI Hackathon

Kotlin Multiplatform, Compose Desktop, Deepgram ASR/TTS, Fireworks AI, Llama 3.1 8B, SQLDelight

- Developed a real-time AI interpreter combining streaming speech recognition, LLM-based translation, and speech synthesis into an end-to-end conversational pipeline.
- Implemented an ASR-to-LLM-to-TTS pipeline using microphone audio capture, Deepgram streaming ASR/TTS, and AMD-hosted Llama 3.1 8B inference via Fireworks AI.

Chapter Stage - Multi-Agent Interactive Learning Platform - [GitHub](#)

Band of Agents Hackathon

Kotlin Multiplatform, FastAPI, LangGraph, Band, Featherless LLM API

- Developed a multi-agent AI learning platform that transforms textbook chapters into interactive learning experiences through coordinated agent workflows for content understanding, assessment, and tutoring.
- Designed an agent orchestration pipeline integrating retrieval, document analysis, interactive template generation, evaluation and deployment of chapter using LangGraph, Band and LLM-based reasoning.
- Developed the Frontend and contributed in Backend API and Band workflow implementation.

AuditForge - Enterprise compliance Auditing Tool - [GitHub](#) - [Certificate](#)

Enterprise AI Hackathon

Kotlin Multiplatform, Compose Multiplatform, Ktor, REST, FastAPI, LangGraph

- Built the KMP/Compose frontend for an AI-powered compliance audit platform targeting Desktop JVM and Web/Wasm.
- Implemented audit session creation, artifact upload, policy-pack selection, scan progress, findings review, remediation details, and signed report download workflows.
- Contributed to full-stack architecture and backend workflow decisions involving FastAPI and LangGraph-based AI audit orchestration.

Volunteering & Teaching Experience

Volunteer Teaching at iCodeGuru - [Website](#)

- Conducted a 6 week course for Fundamentals of Operating Systems at iCodeGuru. [Playlist](#)
- I covered concepts including Processes, Threads, Scheduling and practical labs using Linux and C++ sample code.

Open Source & Technical Communication

- **Typist-CMP:** Compose Multiplatform typing animation library for Android, iOS, Web, and Desktop. [GitHub](#)
- **Canvas Painter:** Cross-platform custom paint/signature library for Android, iOS, Web, and Desktop. [GitHub](#)
- **MetaProbeKMP:** Kotlin Multiplatform URL metadata fetching library for Android, iOS, Desktop, and Web. [GitHub](#)
- Created software-development content through technical writing and YouTube tutorials/playlists. [Medium](#), [Youtube](#)
- Mentored engineers through code reviews, debugging, and release planning at Feres.

Technical Skills

AI/ML:	PyTorch, Stable Diffusion, DreamBooth, Diffusers, OpenAI APIs, MediaPipe GenAI, LiteRT-LM, Llamatik, RAG, OCR, NumPy, Pandas, Jupyter Notebook
Languages:	Kotlin, Python, Java, Dart, PHP, SQL
Mobile/Systems:	Kotlin Multiplatform, Compose Multiplatform, Jetpack Compose, Android SDK, Flutter, Coroutines, gRPC, REST APIs
Architecture:	MVVM, MVI, Clean Architecture, Modularization, Repository Pattern, Dependency Injection, State Management
Backend/Tools:	Laravel, FastAPI basics, Firebase, MySQL, SQLDelight, Ktor, Git, Gradle, Android Studio, IntelliJ IDEA, VPS/LAMP Deployment

Certifications & Languages

Machine Learning Specialization , Coursera / DeepLearning.AI	2022
Python for Data Science, AI & Development , Coursera / IBM	2025
Develop Generative AI Applications , Coursera / IBM	2026
